Full Installation Services

At Webasto, we have a nationwide network of EV-certified, licensed, and bonded electricians who can provide full installation services for your TurboDX charging station. Our electricians will guide you through the entire process from site identification to installation and training to ensure your charging stations are functioning properly.

Full installation services include:

- Obtaining all necessary permits
- Pulling wiring & installation of circuits
- Mounting charging stations
- Testing and validation to ensure charger is operational
- Dealer training on how to use, troubleshoot, and maintain chargers

Key Benefits:

- **Extended warranty with Webasto installation. 3-years parts AND labor (1-year parts only without Webasto installation). Worry-free for 3 years. No disputes regarding responsibility**
- **Over 10,000 installations performed. Our technicians optimize the installation for your current and future needs**
- **Packaged offering - unit installation and exchange or addition of 48A Ford wallbox**
- **Customer service available 24/7 to assist you**
- **Nationwide network of certified, licensed, and trained electricians to get you up and running**

What Sets Our Installation Services Apart?

We have completed over 10,000 residential and dealer installations. Our nationwide network of certified electricians are trained on the specifics of installing dealership and commercial charging equipment. They know the relevant local requirements and have the tools needed to certify that a charger is functioning properly. Not only that, but our electricians will also obtain necessary permits and manage the inspection of the completed installation by the local regulatory agency. You interact with one partner through the entire process eliminating the added hassle of dealing with multiple contractors.

3-Year Extended Warranty When You Use Webasto

TurboDX comes with a standard 1-year parts warranty when you use your own electrician. That means your installation is not covered. Through our experience, we have found that 90+% of charging failures are due to incorrect installations. With the Webasto Installation Program, you have peace-of-mind that your EV Charger is installed correctly. We will identify and address issues before they arise. Our one-stop-shop prevents finger pointing and disputes regarding responsibility. When you use our certified electricians, we offer a 3-year installation warranty plus an extra two years of parts warranty. This means you're covered for 3 years should anything go wrong. In the event your charging station needs to be replaced, our electrician will provide and install your replacement unit. For further assistance, our Customer Service team is available 24/7 to answer any of your charging-related questions. Discover the benefits for yourself and see how easy it is to get your project done when you place it in the hands of a reliable, professional turnkey manufacturer.
